Painting

Color Everywhere

Painting students will apply color with the materials and methods of acrylic or oil painting. They will layer the vocabulary and attributes of color through numerous design composition choices and opportunities. Exercises in color mixing, palette knife painting, and brush techniques will enhance each artists' appreciation and understanding of the possibilities and complexities of paint. Creating beauty in color, will require study in balance, observation, and application. Each project aims to delight the artist not only with the sight but the properties and nuances of color.
